**PUR - Polyurethane parts**

**CP - Clear parts**

**Decal**

Díly ohnuté popř. pokroucené vlivem teplotních změn a stárnutí materiálu, mohou být narovnané do požadovaného tvaru pomocí proudu teplé vody nebo vzduchu (fén na vlasy). Různé drátky a tyčky nejsou přiloženy. Kontaktní plochy doporučujeme před lepením odmastit.

Parts slightly distorted and bent owing to temperature changes or due to material ageing can be straightened to requested shape by hot water or hot air jet (hair dryer). This process can be repeated till result is entirely satisfactory. Wires and rods not included. It is recommended to remove grease from contact areas

K lepení použít kyanoakrylátové lepidlo / For best gluing results use cyanoacrylate glue!

**STEP 3**

**2x**

If you use the exhaust with heating (pieces PUR3 and PUR4), drill a hole into the engine nacelle where the end of PUR4 enters it.  
 Při použití výfuku s topením (s díly PUR3 a PUR4) vyvrtejte v místě vstupu zakončení dílu PUR4 otvor do motorové gondoly.

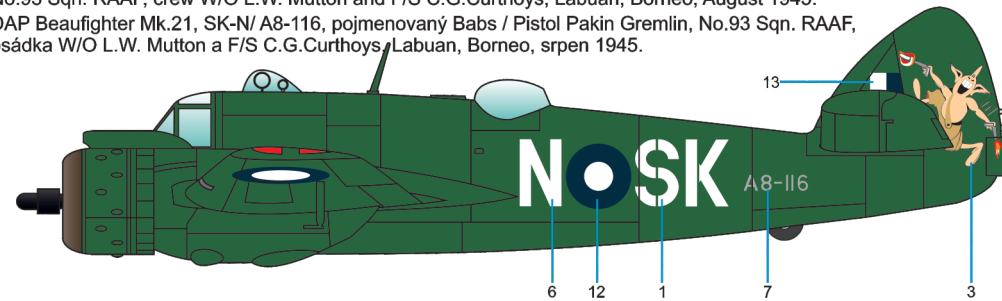

RAAF Beaufighters MK.21 used mostly exhausts without heating (PUR2).  
 RAAF Beaufightery Mk.21 častěji používaly výfuky bez topení (PUR2)
